This Quick Setup Guide provides step-by-step instructions on how to set up Quantum Networks Access Point. After completing the steps described in this Guide, you will be able to install the Access Point (AP) on-site and provide wireless network access to users.

# Glossary

Feature	Description
Management Mode	Standalone: In this mode, each device is configured and
	managed individually. It can be useful in scenarios with few
	devices or sites with limited Internet access and basic features.
	Cloud: In this mode, devices are configured and managed
	from a central controller hosted in the cloud. It offers many
	more sets of features as compared to the Standalone mode.
Operation Mode <b>Bridge:</b> In this mode, the device connects to a net	
	an ethernet cable and extends the coverage over wireless.
	Router: In this mode, the device connects to Internet Service
	Provider directly using DHCP / Static IP / PPPoE protocols
	and shares Internet access over a wired or wireless network to
	users.
Quantum Rudder	Quantum Rudder is a cloud-hosted controller which can be
	used to configure, manage & monitor devices associated with
	it. It can be accessed from <a href="https://rudder.qntmnet.com">https://rudder.qntmnet.com</a>

0	Click to get the option for the firmware update.
*	Click to get back to the home page.
0	Click to check the documentation.
Ć	Click to check device information.

Your Quantum Networks Access Point can work in **"Standalone Mode"** or can be managed by **"Rudder"**.

### **Package contents**

- Access Point.
- Mounting kit

# **Prerequisites**

- Internet access.
- Desktop / Laptop / Handheld device.
- 802.3af / 802.3at PoE Switch / PoE Injector.
- 12V, 2A DC power adapter.

## **Network requisites**

The listed ports must be opened or allowed in the network firewall.

- TCP: 80, 443, 2232, 1883.
- UDP: 123, 1812, 1813.
- Allow rudder.qntmnet.com and reports.qntmnet.com in the destination field.

## **Connect Access Point**

- After unpacking Access Point, connect it to an Internet source.
- Plug-in Ethernet cable of Access Point.
- Power on Access Point by using 802.3af / 802.3at PoE Switch / PoE Injector.

Note: Access Point must have Internet access during initial setup for the first time to activate the device, warranty and support.

# Step 1 – Create new account on Quantum Rudder

- Browse <u>https://rudder.qntmnet.com</u>.
- Click "Create New Account" to sign up for a new account.

		8
	🔒 Sign up

Confirm Password	Confirm Password	Ø
	Register	
		Logir

Figure 1

- Follow the steps as guided on the screen for Registration.
- Verify Quantum Rudder account from registered email id. (you will get )
- Once the account gets validated, it turns the page to "Add License Key" (User will get the license key from respective (Partner / Resource) )
- Account on Quantum Rudder (Quantum Networks Cloud Controller) is now ready to use.

# Step 2 - Basic setup

- Connect the WAN port of the Access Point to the network with Internet access.
- You should see a new wireless network with SSID QN\_XX:XX (where XX:XX are the last four digits of Access Point MAC Address).
- Connect to QN\_XX:XX SSID and browse Access Point's default IP "169.254.1.1".

Let's start the configuration.

On the configuration start page, it will display,

- Device model number
- Serial number
- MAC address
- Current firmware

#### Note:

- Click <sup>1</sup> button to get the option to "change the firmware" if required.
- Click Change Firmware to update firmware if required. Select the firmware file from the respective location and update it.

# **Step 3 - Setting up device IP address**

Click "**Configure"** and set the device IP address by selecting the required options.

- Connectivity Mode Select the connectivity mode.
- Protocol DHCP, Static or PPPoE
- Interface Select interface
- VLAN Assignment- Enable parameter. Enter VLAN ID and click "Fetch IP Address" to get the respective IP in case of VLAN setup is required.

Oevice IP Address	$\rightarrow$	Connectivity Mode Ethernet
Connectivity Mode Ethernet	~	Ethernet USB DHCP
Protocol DHCP	~	Protocol V DHCP V
nterface eth0	~	DHCP Static PPPoE
VLAN Assignement 1 Fetch I IP 192.168.7.40	P Address	Interface eth0 eth1 eth2
Subnet 255.255.255.0		eth3
Gateway 192.168.7.1		Note: As per the Access Point specifications -Connectivity Mode, Protocol and Interface options will come.
Primary DNS 192.168.7.4		Select the options as per the requirement.
Secondary DNS 4.2.2.2		

Figure 3

Click "Proceed" to apply configuration and turn to the next page.

# Step 4 – Set the management mode

# Management Mode

Quantum Networks Access Point can be configured in two modes:

#### Rudder (on cloud / on-premise)

Centralized management of Access Points using Quantum Rudder **Standalone** 

Independent management of each Access Point

Management Settings
Rudder Standalone
Enter Quantum RUDDER Login Credentials
Email Jhon@blick.com
Password 🔹
RUDDER URL / IP Address https://rudder.qntmnet.com
G Back Proceed O

Figure 4

# **Step 5 - Access Point quick setup in Rudder Mode**

• Select "Management Mode" as "Rudder", enter Quantum Rudder login credentials and click "Proceed".

Management Settings  Rudder  Standalone	
Enter Quantum RUDDER Login Credentials Email Jhon@blick.com	
Password (	
RUDDER URL / IP Address https://rudder.qntmnet.com	In the case of on-premise RUDDER, mention the local server IP Address/URL assigned to RUDDER, here.
Figure 5	<u></u>

• It will verify the credentials, and turn to a next page.

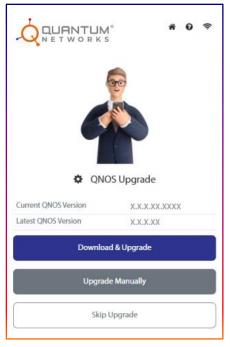

Figure 6

- Upgrade QNOS version by either downloading from the cloud or by selecting manually from respective location and upgrade or click "**Skip Upgrade**" to move further.
- The user will turn to a page where the user has to select the site and AP group.

	ТШМ <sup>®</sup> R K S	# O	(î;
0	RUDDER Setup		
Select Site Quantum HO			~
Select AP Group Head office			~
<b>G</b> Back		Proceed	Ð

Figure 7

- Select Rudder site and AP Group where Access Point's needs to be added and click "**Proceed**".
- If the selected site is already having another Access Point, it will automatically configure AP in a bridge mode and will turn the user on the summary page after clicking **"Proceed"**. (Figure 8)
- If this is the first Access Point for the selected site the user will turn on the page, where the user can select Access Point Operation mode as **Bridge** or **Router**. (Figure 9)

### **Reset Access Point to factory defaults**

- Power on the Access Point
- Push the reset button on the back panel and hold it for 10 seconds.
- o Access Point would restart with factory defaults

#### Access Point default login detail

With standalone mode:

User Name: Created while doing "Quick Setup"

**Password:** Created while doing "Quick Setup"

With Rudder mode:

**User Name:** Auto Generated, administrator can change from site settings.

**Password:** Auto Generated, administrator can change from site settings.
