This Quick Setup Guide provides step-by-step instructions on how to set up Quantum Networks Access Point. After completing the steps described in this Guide, you will be able to install the Access Point (AP) on-site and provide wireless network access to users.

Glossary

Feature	Description	
Management Mode	Standalone: In this mode, each device is configured and	
	managed individually. It can be useful in scenarios with few	
	devices or sites with limited Internet access and basic features.	
	Cloud: In this mode, devices are configured and managed	
	from a central controller hosted in the cloud. It offers many	
	more sets of features as compared to the Standalone mode.	
Operation Mode	Bridge: In this mode, the device connects to a network over	
	an ethernet cable and extends the coverage over wireless.	
	Router: In this mode, the device connects to Internet Service	
	Provider directly using DHCP / Static IP / PPPoE protocols	
	and shares Internet access over a wired or wireless network to	
	users.	
Quantum Rudder	Quantum Rudder is a cloud-hosted controller which can be	
	used to configure, manage & monitor devices associated with	
	it. It can be accessed from https://rudder.qntmnet.com

Your Quantum Networks Access Point can work in **"Standalone Mode"** or can be managed by **"Rudder"**.

Package contents

- Access Point.
- Mounting kit

Prerequisites

- Internet access.
- Desktop / Laptop / Handheld device.
- 802.3af / 802.3at PoE Switch / PoE Injector.
- 12V, 2A DC power adapter.

Network requisites

The listed ports must be opened or allowed in the network firewall.

- TCP: 80, 443, 2232, 1883.
- UDP: 123, 1812, 1813.
- Allow rudder.qntmnet.com and reports.qntmnet.com in the destination field.

Connect Access Point

- After unpacking Access Point, connect it to an Internet source.
- Plug-in Ethernet cable of Access Point.
- Power on Access Point by using 802.3af / 802.3at PoE Switch / PoE Injector.

Note: Access Point must have Internet access during initial setup for the first time to activate the device, warranty and support.

Step 1 – Create new account on Quantum Rudder

- Browse <u>https://rudder.qntmnet.com</u>.
- Click "Create New Account" to sign up for a new account.

	DER Services Controller	®

		Logi

Figure 1

- Follow the steps as guided on the screen for Registration.
- Verify Quantum Rudder account from registered email id. (you will get)
- Once the account gets validated, it turns the page to "Add License Key" (User will get the license key from respective (Partner / Resource))
- Account on Quantum Rudder (Quantum Networks Cloud Controller) is now ready to use.

Step 2 - Basic setup

- Connect the WAN port of the Access Point to the network with Internet access.
- You should see a new wireless network with SSID QN_XX:XX (where XX:XX are the last four digits of Access Point MAC Address).
- Connect to QN_XX:XX SSID and browse Access Point's default IP "169.254.1.1".

Let's start the configuration.

On the configuration start page, it will display,

- Device model number
- Serial number
- MAC address
- Current firmware

Note:

- Click ¹ button to get the option to "change the firmware" if required.
- Click Change Firmware to update firmware if required. Select the firmware file from the respective location and update it.

Step 3 - Setting up device IP address

Click "**Configure**" and set the device IP address by selecting the required options.

- Connectivity Mode Select the connectivity mode.
- Protocol DHCP, Static or PPPoE
- Interface Select interface
- VLAN Assignment- Enable parameter. Enter VLAN ID and click "Fetch IP Address" to get the respective IP in case of VLAN setup is required.

Oevice IP Address	\rightarrow	Connectivity Mode Ethernet
Connectivity Mode Ethernet	~	Ethernet USB DHCP
Protocol DHCP	~	Protocol V DHCP V
nterface eth0	~	DHCP Static PPPoE
VLAN Assignement 1 Fetch I IP 192.168.7.40	P Address	Interface eth0 eth1 eth2
Subnet 255.255.255.0		eth3
Gateway 192.168.7.1		Note: As per the Access Point specifications -Connectivity Mode, Protocol and Interface options will come.
Primary DNS 192.168.7.4		Select the options as per the requirement.
Secondary DNS 4.2.2.2		

Figure 3

Click "Proceed" to apply configuration and turn to the next page.

Step 4 – Set the management mode

Management Mode

Quantum Networks Access Point can be configured in two modes:

Rudder (on cloud / on-premise)

Centralized management of Access Points using Quantum Rudder **Standalone**

Independent management of each Access Point

Management Settings
Rudder Standalone
Enter Quantum RUDDER Login Credentials
Email Jhon@blick.com
Password 🔹
RUDDER URL / IP Address https://rudder.qntmnet.com
G Back Proceed O

Figure 4

Step 5 - Access Point quick setup in Rudder Mode

• Select "Management Mode" as "Rudder", enter Quantum Rudder login credentials and click "Proceed".

Management Settings Rudder Standalone	
Enter Quantum RUDDER Login Credentials Email Jhon@blick.com	
Password (
RUDDER URL / IP Address https://rudder.qntmnet.com	In the case of on-premise RUDDER, mention the local server IP Address/URL assigned to RUDDER, here.
Figure 5	<u></u>

• It will verify the credentials, and turn to a next page.

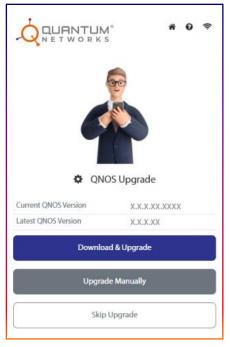

Figure 6

- Upgrade QNOS version by either downloading from the cloud or by selecting manually from respective location and upgrade or click "**Skip Upgrade**" to move further.
- The user will turn to a page where the user has to select the site and AP group.

FCC statement

FCC Class B

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible. This device is restricted for indoor use.

IMPORTANT NOTE: FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 24 cm between the radiator and your body.

Installation location: To meet regulatory RF exposure requirements, this product shall be installed at a location where, during normal operations, the radiating antenna is at least 24 cm away from any nearby persons.

External antenna: Use only the antennas which have been approved by the applicant. Using non-approved antenna(s) is prohibited and may produce unwanted spurious or excessive RF transmitting power which may lead to a violation of FCC limits.

Installation procedure: Please refer to this equipment's user manual for the procedure details.

Warning: The installation position must be carefully selected so that the final output power does not exceed the limit set forth in relevant regulations. Violation of output power regulations could lead to serious federal penalties.

CE Statement

This equipment complies with EU radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 24 cm between the radiator and your body.

The device is restricted to indoor use only when operating in the 5150 to 5350MHz frequency range.

All operational modes:

2.4GHz: 802.11b, 802.11g, 802.11n(HT20), 802.11n(HT40), 802.11ac(VHT20), 802.11ac(VHT40), 802.11ax(HE20), 802.11ax(HE40)

5 GHz: 802.11a, 802.11n (HT20), 802.11n (HT40), 802.11ac(VHT20), 802.11ac(VHT40), 802.11ac(VHT80), 802.11ax(HE20), 802.11ax(HE40), 802.11ax(HE80)

BLE 2.4GHz: 802.15.1

The frequency and maximum transmitted power limit in EU are listed as below:

2412-2472MHz: 20 dBm

5150-5350MHz: 23 dBm

5500-5700MHz: 30 dBm

AT	BE	ВG	СН	CY	CZ
DE	DK	EE	EL	ES	FI
FR	HR	HU	IE	IS	IT
LI	LT	LU	LV	MT	NL
NO	PL	PT	RO	SE	SI
SK	TR	UK			

The abbreviations of the countries, as prescribed in above table, where any restrictions on putting into service or any requirements for authorization of use exist.

CE Mark Declaration of Conformance for EMI and Safety (EEC)

This information technology equipment is in compliance with the Directive 2014/53/EU and Directive2014/35/EU.

The Declaration of Conformity (DoC) can be obtained from:

www.qntmnet.com> resource-library.
