PRODUCT OVERVIEW

QN-O-230 smart antenna and MIMO technology provide high data rates even in medium-density and high-interference environments. SFP backhaul port allows service providers to backhaul data over fiber without additional hardware devices to convert Fiber to Ethernet.

QN-O-230 is manageable through a centralized platform and supported by Quantum Networks DevOps and maintenance. QN-O-230 can also deploy as a standalone Access Point.

Each Access Point comes with a one-year limited liability manufacturer's warranty from the date of activation and theft prevention functionality to protect assets from misuse.

KEY FEATURES

Deliver high-performance outdoor Wi-Fi access
Deploy secure and reliable outdoor hotspots at Transportation hubs, Stadiums, Smart cities and Rural Wi-Fi setups.

Phenomenal Wi-Fi performance
It is engineered for phenomenal Wi-Fi performance even in medium-density environments for demanding voice and video applications. Provides improved coverage, increased capacity and seamless performance in medium-dense environments.

Cost-Efficient Connectivity
Reduces operational costs and the expense of additional hardware required for deployment by service providers/telcos. SFP port provides high-speed fiber backhaul without any additional hardware.

Theft prevention functionality
Access Point is locked for deployment in any other network until decommissioned from the existing network.

Industrial grade IP67 enclosure
IP67 rating can withstand challenging environments with extreme temperatures and dusty environments.

Easy to manage
Easily manage Wi-Fi infrastructure through the feature-rich Quantum Rudder management console.
